

## V11 Purchase Order Management

On-time delivery always guarantees customer satisfaction and good business. FlexSystem Purchase Order Management controls the inventory purchasing side of any business; trackspurchase orders, vendor prices and quantities onorder; helps the purchase department to maintainan optimized inventory level and significantly lowerthe daily workload. PO will be generated automatically when inventory falls below a userdefined griggering level. With the built-in lead time calculator, the company can be assured the purchase always meets the customer / production due dates. Eventually, the company can improve its inventory efficiency and eliminate shortages in stocks.
