

# Powerful Reporting Tool

*that unleashes FlexAccount data power*

# Function Highlights

## Online Data In Spreadsheet

Instead of data import or export functions, FION V13 is totally integrated with spreadsheet applications as an add-in function, meaning that you can fully enjoy native spreadsheet functionalities to retrieve any key FlexAccount data, thereby delivering to you a direct, effective and efficient user experience.

## Easy To Use

The design of the financial data retrieval engine facilitates both non-technical and technical users, through enabling the breaking down of simple and complex report into meaningful query blocks, which can then be easily combined together to achieve desired end result.

## Intuitive UI

This reporting tool is designed for financial professionals and optimised for accounting, via our real world business mapping interface, thereby enabling user to easily and instantly retrieve data using already familiar accounting terms, such as Account Code, Period, Voucher, Current Year Actual, Current Year Budget.

## Integrated With Report Writer

If you are already an experienced FlexAccount user, you can easily find all the familiar keywords from Report Writer already within FION V13, such as ledger figure comparisons, monthly status, multi-level cost center analysis, debtor and creditor balance, and selection with match patterns.

## Configured Report Templates

High quality reporting templates are readily available. Reports utilising the intuitive user interface to map your Chart of Accounts into these reporting templates, and further customise them based on your own needs.

## Financial Performance On Dashboard

FION V13 enriches your presentation capabilities by utilising value-added features. The dashboard delivers an interactive analysis environment to present critical data into a visual and graphical format. Logos, images and clipart can also be added to suit for your unique presentation style.

# Technology Advantages

## Remote Access

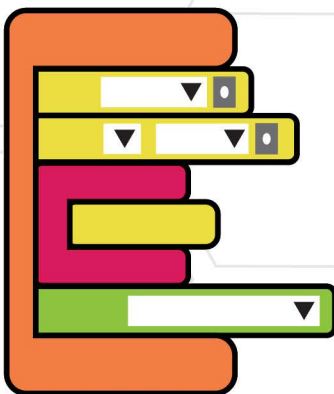

User on the move can quickly access FlexAccount from the internet to retrieve or update their data. On top of this FION V13 has been efficiently designed to process and retrieve data at the server, which significantly minimises processing time as data is not being passed back to the client station for processing.

## Drill Down Into Details

Utilising a few mouse clicks, you can directly drill down from summary level to transaction detail to instantly see every single point within the source document for purposes of accounting entry traceability.

## FionBrick - Blocky Formula Maker

Another option for data visualisation comes with FionBrick which sees all of the accounting key dimensions encoded into a blocky. You simply select the dimension of interest and then drag-and-drop them into the report for instant multi-dimensional analysis. Data can be sliced into other dimensions by simply moving these blocks on the screen.

# PROVEN SOFTWARE TRUSTED BY WORLDLEADING BRANDS

Founded in 1987, FlexSystem Limited has simplified accounting in industries, including retail, hospitality and financial services where timely performance and high security are paramount.
