

Premium Accounting Solution

that takes control of your finances

FlexAccount V13

Function Highlights

Go Beyond Core Accounting

FlexAccount V13 is built for financial professionals with core accounting management capabilities. It captures details from every accounting transaction, including who, what, when, where and why, in one place to slash time spent on checking and decision making.

Stress-free Billing & Invoicing

FlexAccount V13 supports different types of billing, payment terms and time intervals to automate invoicing process and ensure accuracy. These automated and configurable billing processes eliminate manual error and revenue leakage risk, thereby increasing efficiency.

Control Cash Flow

Realtime cash balance is easy to access. Since FlexAccount processes payments across all transaction types, including supplier payment, customer payment, payroll, expense reimbursement and project costing, it projects a complete visibility into all of cash inflows and outflows.

Ledger Consolidation

Ledgers with different account codes, year-end dates, average rate, closing rate and currency are now easily combined into the consolidation ledger, significantly minimizing the consolidation workload and processing time.

Extended Analysis Capabilities

FlexAccount V13 enables analysis by configurable dimensions together with comprehensive tagging for both multiple analysis codes and extended analysis codes (up to 15). Thereby, transaction can be categorized with different tags, by company, account, product, cost center, project, customer, location, segment and a lot more.

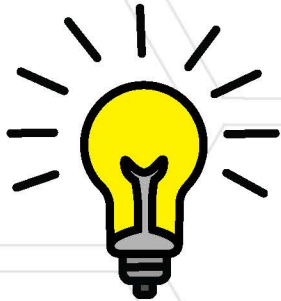

Financial Reporting and Analysis

We create new level of insight by delivering deep accounting analysis through the use of comprehensive multi-dimensional and online reporting. It keeps full integrity throughout transactional, management and financial reporting lifecycles.

Technology Advantages

New UI

FlexClient is an intuitive user interface that enables all types of user, whether new or experienced, to navigate throughout the software application with minimal training. Innovative technology gives greater flexibility to deploy applications, with data being easily accessible from desktop or mobile devices with a web browser.

Cloud Accounting

FlexAccount V13 provides on premise and cloud base modeling. It can be hosted into the cloud environment for user to choose either the traditional FlexClient desktop or web browser version.

FION Report Viewer

As FlexAccount V13 is embedded with a spreadsheet viewer, financial reports, especially FION (i.e. Financial Information ON-line) can now be viewed in the accounting system instead of relying on spreadsheet applications.

Robust Security

FlexSystem provides easy-to-manage and easy-to-configure access rights to all data fields through leveraging of latest cryptographic algorithm technologies. It is also compatible with your security infrastructure to ensure that all information is well protected.

PROVEN SOFTWARE TRUSTED BY WORLDLEADING BRANDS

Founded in 1987, FlexSystem Limited has simplified accounting in industries, including retail, hospitality and financial services where timely performance and high security are paramount.

FlexAccount's full-featured platform has powered many high-value brands, including many of the Forbes Global 2000.

- 35+ years of proven result
